**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Nothing to add.

Forecast for Sunday 14 Aug 2022

Weather: The change is upon us with showers possible throughout, these turning heavy at times bringing the risk of hail, thunder and potentially flooding of smaller water courses where they linger. However given the showery nature of the flow some will escape with dry and occasionally bright conditions and temperatures will remain respectable for mid-August.

Maximum wind: Variable 15mph or less

Chance of cloud-free hill tops above 700m: 90% at this level with bases lowering sporadically in showers.

Low cloud and visibility: Good or very good, becoming moderate or poor in showers, also very poor within cloud as bases lower 450-600m in showers.

Temperature: **Valleys:** Plus 10 Celsius increasing 25 Celsius for a time during the afternoon
At 700m: Plus 14 Celsius increasing 18 Celsius for a time during the afternoon
Freezing level: Well above all peaks
